

SECURA TAP FITTING GUIDE

This guide is not an exhaustive list of all compatible/incompatible tap shapes. It is the customer's responsibility to determine if their tap type is compatible. For easier installation apply a thin film of washing up liquid to the end of the tap to reduce friction.

Most taps with a **CIRCULAR** or **OVALISED** cross section **ARE COMPATIBLE**. Four examples are shown on the left hand side below.

Most taps with a **NON-CIRCULAR** or **NON-OVALISED** cross section are **NOT COMPATIBLE**. Some examples are shown on the right hand side below.
